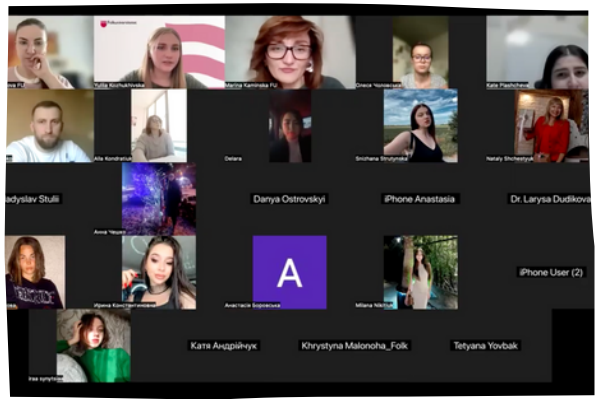
Virtual Exchanges



Innovative Aspect

The VirtuallyEDU project is both innovative and strongly transnational, being ***the first initiative*** to develop educational material that enhances digital literacy in Higher Education with a special focus on cybersecurity.

At the same time, VirtuallyEDU pioneers ***virtual mobility exchanges between the EU and Eastern Neighbourhood***, involving more than 300 higher education leaders, staff, and trainers. These exchanges strengthen project management, evaluation, and digital teaching skills, while allowing students from the region to engage with EU peers, apply the DigiComp framework and European methodologies, and adapt this knowledge to their local contexts. In this way, VirtuallyEDU raises the quality of higher education and promotes meaningful cross-border cooperation and mutual learning.
